Continuing support

Feedback

The course has been invaluable, I have learnt so much about the business and the foundations of OH.

I love how interactive the course has been, this was a worry of mine as I didn't know how much would be self-led study.

I've loved that everyone has come together, and we've all been able to share our thoughts and feelings and hopefully support each other too.

Overall, an excellent course, with a great course lead and team of tutors/mentors who provided a much-needed human touch and never seemed to tire of answering questions.
Thank you!
