Occupational Health Physician

Are you looking for your next Occupational Health challenge?
Realise your full potential working for a dynamic multidisciplinary team with excellent administrative support.

Medigold Health is one of the UK's most respected and established providers of corporate healthcare services. We have been involved in the business of helping employers to keep their people in work, safe and well for two decades.

We are a clinically led organisation from the top down. Our Executive Chairman and Founder, Dr Mike Goldsmith, established the Medigold Health brand and service delivery model on the uncompromising principles of quality and integrity.

As we are still 100% family owned, we exhibit the commitment and warmth that one would expect from a company of this nature. However, we combine this friendly approach with big ambition, a robust growth strategy and continuous investment in our most valuable asset – our people.

As a successful and expanding company we are looking for enthusiastic Occupational Health Physicians all over the country and most specifically in the London, Berkshire, Surrey, Southampton and East Midland areas, to provide robust advice to our many customers working in a wide variety of organisations. Full GMC registration, Occupational Health qualifications and full driving licence are required.

In return for your hard work, we offer a very competitive salary package and support for CPD, alongside significant career progression. As you would expect from the leading provider in our field, we also provide employees with a comprehensive array of benefits to choose from.

If you are interested in these exciting and challenging opportunities please apply by email, sending a covering letter and your CV, to HR@medigold-health.com.
