(Off-street parking available)

OCCUPATIONAL HEALTH PHYSICIANS

Newly qualified or developing Occupational Health Physicians (Diploma-level) seeking to build practical competence in health surveillance delivery across key risk areas: respiratory, noise, and hand-arm vibration.

WHAT YOU'LL GAIN:

- Understanding of the legal framework (HSE, COSHH, Noise & Vibration Regs)
- Insight into surveillance protocols and clinical thresholds
- Practical skills in interpreting audiometry and spirometry
- Tools to implement effective workplace surveillance schemes
