

Occupational Health Technician Course

Price £490 + VAT Launch Date 12 January 2023

A highly interactive online course, suitable for both existing technicians and new entrants to the profession, that you can work through independently at a time that suits you.

Includes an initial virtual session run by an EOPH faculty expert.

Virtual Launch 12pm-1pm or 4pm-5pm

Click here to [book](#) or Email admin@eoph.co.uk for further information.

Course Overview This course is split into 2 parts, both of which comprise Online Learning Modules:

Part 1: Online Learning Modules - Introduction to Occupational Health

This is a full introduction to all aspects of the role of the Occupational Health Technician including necessary background information and the main duties and areas of work you will undertake. These interactive E-learning modules provide you with all the knowledge you require to competently undertake this exciting role, whilst also increasing your confidence and understanding of what the job really entails.

Part 2: Online Learning Modules - Theoretical Concepts behind Practical Requirements of the Role

These further E-Learning modules look at the more practical aspects of an Occupational Health Technician role. They will improve your theoretical understanding of the practical tasks you will undertake in your day to day role. Alongside this is an Occupational Health Technician Competency Booklet, put together in conjunction with the SOM, for your supervisor to sign off.

Emma Giblin

Consultant Occupational Health Physician

MSc MB BS PgCertMedEd FRCR FHEA MFOM

Emma Giblin is an occupational health physician who has worked with the team at EOPH for over a year. She has a wide experience in teaching and development of training programmes for health professionals. Her daily occupational health practice spans a wide range of sectors with her specialist interests including higher education and the National Health Service.

Kathy Roberts

Registered Member of ACPOHE

MSc HCPC, MCSP

Kathy is a chartered physiotherapist, specialising in occupational health and ergonomics. Over the last 25 years she has enjoyed working in many different occupational health environments; supporting the prevention, treatment and management of work-relevant injury and illness. As a passionate educator in this field, Kathy's work now includes university lecturing, post-graduate training and the development of face to face and online education across the various multi-professional occupational health groups.
