

Bupa is recruiting for Occupational Health Physicians across Solihull, Reading and London

Our positions can be offered on either a salaried or a self employed basis from 1- 4 days per week dependant on location.

What you'll be doing

You'll be delivering a range of Bupa Occupational Health services carrying out regular clinical sessions. You'll provide advice to Occupational Health Advisers, Occupational Health Practice Nurses and clients on health related problems affecting work, rehabilitation and resettlement into appropriate workplaces as well as providing Occupational Health Physician input to major clients including advice on policies and procedures.

What's a typical day?

- Providing medical interpretation of health surveillance data and fitness for work decisions
- Supporting attendance management by individual consultations and case conferences in accordance with GMC and Bupa best practice guidance. Cases may be referred from our web and telephone based service
- Case manage complex occupational health referrals, according to contract and in the context of Bupa clinical governance framework and relevant legislation
- Work closely with the Lead Physician and Operations Manager to ensure effective communication of all occupational health matters to colleagues and provide appropriate clinical support
- Ensure that your input to Occupational Health services is delivered as defined in the quality standards and S.L.A. taking into consideration all necessary professional codes of conduct and evidence based practice

Who we're looking for?

- Full registration with a current licence to practise
- Occupational Health experience
- MFOM or AFOM preferred
- Excellent interpersonal/communication skills
- Commercial awareness an advantage
- Customer focused
- Clinical Quality focused
- Pro-active and able to work independently
